author of
*The Pentagon,
Climate Change & War,*
co-director of
Costs Of War,
and Montague Burton
Professor, University
of Oxford, UK

Join us on Zoom for this Third Tuesday Forum

TUES., JANUARY 17, 2023
12:00 NOON EST

Photo: U.S. Navy Archives

Join author Neta Crawford as she discusses how the Pentagon became the world's largest single greenhouse gas emitter — and why it's not too late to break the link between national security and fossil fuel consumption.

Examining the idea of climate change as a “threat multiplier” in national security, she argues that the United States faces more risk from climate change than from lost access to Persian Gulf oil—or from most military conflicts. The most effective way to cut military emissions, Crawford suggests provocatively, is to rethink U.S. grand strategy, which would enable the United States to reduce the size and operations of the military.

The Zoom event will **not** be recorded so please join us on 1/17/23!

This event is free but we always accept donations of any amount to support our work. Visit npeaceaction.org/join-renew-donate
