

On Saturday, October 1st, from 11:30 till 12:30, we will hold a Vigil for Disarmament at Bath Iron Works in Solidarity with the International Week of Protest to Stop the Militarization of Space. We will gather across from the Administration Building on Washington St and then walk up the street holding signs and banners to leaflet the workers at the noon shift change. War is madness and the continued production of warships at BIW only perpetuates empire and continues to be a Crime Against Humanity. Instead we can work to create a disarmed world through love and nonviolence and use our resources to heal our beloved Mother Earth. Together, we stand in Hope and speak out against the idolatry found in the building of the Aegis nuclear capable guided missile destroyers. Please bring signs and banners saying No! to the production of weapons of mass destruction in Maine. FMI: Smilin' Trees Disarmament Farm, 207-763-4062.
